Education

D.Y. Patil Deemed to be University

B.Tech – Computer Science & Engineering (AI & ML)

CGPA: 7.42

July 2023 – June 2027

Navi Mumbai, India

Board of Secondary Education, Rajasthan

Senior Secondary (XII) – Science

66.20%

March – April 2023

Gayatri VM Sr. SS, Sanchore, Jalore

Board of Secondary Education, Rajasthan

Secondary (X)

96.00%

July 2021

Gayatri VM Sr. SS, Sanchore, Jalore

Technical Skills

- **Languages:** Python (Advanced), Java, JavaScript, C, SQL
- **ML & AI:** Supervised/Unsupervised Learning, Reinforcement Learning (DQN), Transfer Learning, Feature Engineering, MLOps
- **Deep Learning:** CNNs, RNNs, Object Detection (R-CNN, YOLO), Image Classification, Model Fine-tuning
- **Frameworks:** TensorFlow, PyTorch, Keras, Scikit-learn, Pandas, NumPy, Matplotlib, OpenCV, FastAPI
- **Tools & Databases:** Git, GitHub, Google Colab, Docker, MySQL, Linux, Jenkins, MLflow

Experience

Outlier.ai

Machine Learning Freelancer

2024 – Present

Remote

- Trained and fine-tuned ML models (classification, regression, NLP).
- Preprocessed datasets exceeding 100K+ records using Pandas and NumPy – missing value handling, feature engineering, and normalisation.
- Evaluated models using cross-validation, ROC-AUC, confusion matrices, and precision-recall metrics; delivered production-ready solutions.

Projects

YouTube Comment Analyze | FastAPI, LangChain, RAG, Sentence Transformers, MLflow, Docker

Nov 2025

- Contributed to an AI-powered YouTube comment analysis platform that processes comments using NLP/LLM pipelines for sentiment analysis, question detection, insights, and automated response generation.
- Worked with RAG, vector embeddings, and Sentence Transformers to support semantic retrieval and context-aware response generation. Contributed to the FastAPI backend and production pipeline, with containerization using Docker and experiment/evaluation tracking through MLflow. Collaborated through Git/GitHub and contributed to an existing open-source codebase with testing and CI/CD workflows.

Autonomous Snake Game – Deep Q-Learning | Python, TensorFlow, Pygame

Jul 2024

- Developed autonomous RL agents using tabular Q-Learning and DQN; trained and evaluated agents across 1,000 episodes, with DQN achieving 35.67 average score and 73 maximum score in 100 deterministic evaluation games. Implemented custom state representation, reward shaping, epsilon-greedy exploration, experience replay, and neural-network function approximation.
- Built and compared tabular Q-Learning and DQN agents for autonomous Snake gameplay, training each for 1,000 episodes. DQN achieved a 28.44 last-100 training average vs. 3.16 for Q-Learning, with 35.67 average score and 73 maximum score across 100 deterministic evaluation episodes.

Gym Injury Risk Predictor | Python, FastAPI, MLOps, Render

2025

- Built an end-to-end ML-powered web app predicting gym injury risk from age, BMI, weight lifted, sets, reps, sleep hours, rest days, and injury history.
- Deployed classification model with a FastAPI on Render; applied MLOps practices including model versioning and automated preprocessing pipeline.
- Engineered workout-specific features improving prediction reliability across diverse fitness profiles.

Achievements & Certifications

- **AWS Academy Graduate – Machine Learning Foundations** — AWS Academy via [Credly](#) | 20 hrs Apr 2026
- **AWS Academy Graduate – Cloud Foundations** — AWS Academy via [Credly](#) | 20 hrs Apr 2026
- **Generative AI and LLMs on AWS** — [edX](#) – Prompt Engineering, RAG, AI Agents, AWS SageMaker May 2025
- **Introduction to Web Development – HTML5, CSS3, JavaScript** — IBM via [edX](#) – Responsive Design, DOM Manipulation May 2025
- **Python Basics for Data Science** — IBM via [edX](#) – Pandas, NumPy, Data Analysis, Data Visualisation Apr 2025
- **Data Science for Engineers** — Indian Institute of Technology–Madras via [NPTEL](#) – Pandas, NumPy, Data Analysis, Data Visualisation Aug 2026

Hobbies

- Programming, Chess, Reading, Sports (Football, Badminton), Gym
